

**“Tell me and I forget. Teach me and I remember. Involve me and I learn.”**

**Benjamin Franklin**

Vision Statement:

At Rendlesham Primary School, we believe in empowering our students through curiosity and real-world discovery in Science.

Intent of our Science provision:

We believe in nurturing a passion for science through hands-on, practical experiences that ignite curiosity and spark lifelong learning. We want our students to develop an understanding of the nature, processes and methods of science through different types of scientific enquiries. In addition to this, we want our students to see the purpose of their enquiries, within real-life contexts. Our curriculum aims to empower students to become curious, informed, and responsible citizens who understand the importance of science in shaping the future.

We have designed a science curriculum so that our learners:

- Develop a sense of curiosity and excitement for scientific learning and discovery.
- Build links in their learning, through cross-curricular work.
- Engage in hands-on, practical experiences.
- Extend their scientific knowledge beyond the classroom.
- Recognise the relevance and importance of science in their lives.
